Nebraska Career Development Event Handbook and Rules for 2022-2027

1. EVENT PURPOSE

- a. The purpose of the Nebraska State Agronomy Career Development Event is to create interest and promote understanding in agronomy by providing opportunities for recognition through the demonstration of skills and proficiencies. It also gives students an opportunity to explore career opportunities available in agronomy and encourages students to pursue careers in agronomy.
- Agriculture Education courses that align with the Agronomy CDE include: Introduction to Agriculture, Food, and Natural Resources, Plant Science, Crop Management, or Agronomy.

2. OBJECTIVES

a. Team Activity Objectives

I. Each team will apply their knowledge of basic agronomic principles & practices, by evaluating a field scenario provided to them, along with all the necessary reference information and mathematical formulas to answer specific questions.

b. Individual Objectives

- I. <u>Plant and Seed Identification (including crops and weeds)</u>: The foundation of all agronomic and horticultural cropping systems are built around the crop species themselves. Students will develop the ability to differentiate common agronomic and horticultural crops from each other, and from common and/or economically important weed species by:
 - i. Recognizing and utilizing unique identifying plant and/or seed characteristics to correctly distinguish crop or weed specimens from each other and identify the depicted specimens via high quality digital photographs, preserved specimens or fresh, live plant or seed samples.
 - ii. Developing a working knowledge of appropriate plant anatomy terminology to accurately and adequately describe plant specimens (not tested over). (See Appendix 1)
- II. <u>Entomology</u>: All effective and appropriate pest management plans require the correct identification of entomological pests and beneficial insects, as well as a comprehensive understanding for the various and complex life cycles. Students will demonstrate their mastery of this content area by:
 - i. Identifying common agronomic pest species using unique characteristics exhibiting in either larvae or adult specimens. (See Appendix 2)
 - ii. Correctly differentiating orders of entomological pests and beneficial species by matching depicted specimens with the appropriate life cycle.
 - iii. Correctly assigning depicted specimens into the ecological niches they occupy. (e.g. pest vs. beneficial, what plant component they damage). (See Appendix 2)
- III. <u>Plant Diseases, Conditions, and Disorders</u>: All effective and appropriate crop management plans require the correct identification of many different biotic and abiotic causal agents before any further action can be taken. Student will showcase this critical skill by:
 - i. Identifying common plant diseases, conditions, or disorders shown in various agronomic crops via high quality digital photographs, preserved specimens or fresh, live samples.
 - ii. Correctly distinguishing and categorizing the depicted plant disease, condition, or disorder into causal agent groups (e.g. bacterial, fungal, viral, environmental, etc).

- iii. Discerning the correct crop plant components damaged by the depicted causal agent. (See Appendix 3)
- IV. Machinery/Equipment: The use of various types of machinery ranging from tillage operations to harvest have a long and storied application in agronomic fields. Recent advancements in precision-based technologies has further augmented these technologies and improved production efficiencies. Student will depict their content knowledge of this area by:
 - i. Differentiating commonly used agronomic machinery and precision-agriculture technologies.
 - ii. Identifying personal protection equipment and their applicable use. (See Appendix 4)
- V. <u>Soils</u>: The basis of all agronomic systems and arguably all life on earth, the study of soils, soil characteristics and properties are the cornerstone to the science of Agronomy. Student will demonstrate their mastery of soil science content by:
 - i. Correctly identifying the processes and factors involved in the formation and development of soils.
 - ii. Analyzing common agronomic problems related to the physical and chemical soil properties and how they relate to soil water issues.
 - iii. Identifying environmental factors which influence soil erosion.
 - iv. Demonstrating their ability to locate and utilize data from Web Soil Survey reports, graphics or summaries.

3. ELIGIBILITY

- a. The Agronomy CDE is a district qualifying event at the state level. The top 25% of schools in a district may qualify a team to the state CDE. Teams shall consist of four students. Schools must register a full team, however teams with less than four students may participate and will not be eligible to earn all points.
- b. Agriculture Education students currently in 9th-12th grade are eligible CDE contestants.
 - I. Students who have either won the state contest, and/or competed at the national level are not eligible to compete again at the state level.
- c. Team make-up:
 - I. Team size shall be four members, all of whom must be pre-registered as 'participant' or 'alternate'.
 - i. No exceptions will be made if a school or team is not registered.
 - ii. Incomplete teams ranging from one to three students are allowed if a school is unable to field a full team.
 - iii. All four team members will be scored and all four individual scores

II. All four team members are eligible for individual awards.

4. RECOMMENDED ATTIRE

- a. All FFA members are encouraged to wear Official Dress and non-FFA members are encouraged to wear professional attire.
- b. If FFA official dress is not worn, students will be issued name tags at registration identifying their names, school and group.

5. REQUIRED SUPPLIES AND EQUIPMENT

- a. #2 Pencils
- b. A calculator for basic arithmetic. (No cell phone calculators are allowed.)
- c. A clean clipboard per student (Must be free of marks or notes.)
- d. Participants must <u>not</u> bring any notes, training aids, any electronic communication items, purses or backpacks, or any other personal belongings.

6. EVENT SCHEDULE

- Students will be divided into ten groups and are expected to remain in their assigned group until the team component.
- b. After completing the ten, 13-minute individual rotations, students will then rejoin their team members for the team component in an 11th, 13-minute rotation.

7. ANNUAL THEME

Topic areas for the Team Activity will rotate on a yearly basis through the following:

a.	Alternative Crops (e.g. Dry Beans, Potato, Sugar Beet, Oilseeds, etc.)	2023
b.	Corn-Soybean Cropping Systems	2024
C.	Wheat and Small Grains	2025
d.	Rangeland and Forage Production	2026

8. EVENT FORMAT

Team component:

a.	Plants & Seeds:	5, 13-minute rotations of 15 samples each
b.	Entomology:	1, 13-minute rotation of 15 Samples
	0,	
a.	Plant diseases/disorders:	1, 13-minute rotation of 15 Samples
b.	Machinery/PPE:	1, 13-minute rotation of 20 Samples
C.	Soil science:	2, 13-minute rotations of 15 questions each

1, 13-minute rotation of 10-15 questions

9. SCORING

d.

Individual Event		Iotal Points
DI 100 III I''	(75 Specimen x 4 Points)	300
Plant & Seed Identification		
Entomology	(15 Specimens x 10 Points)	150
(6 Points	Specimen ID, 2 Points Damage, 2 Points	s Life Cycle)
Plant Diseases, Disorders,	(15 specimens x 10 points)	150
Conditions		
(6	points ID, 2 points damage, 2 points biotic g	roup)
Machinery & PPE	(20 x 3 points each)	60
Soil Science	(30 x 5 points each)	150
(20 Questions deriv	ed from <i>From the Surface Down</i> and link	ked PASSeL websites)
(10 Questions	derived from Web Soil Survey (Resourc	e links to follow)
Total Score		810

leam Event		iotal Points
Individual Scores	(4 students x 810 points possible)	3240
Team Multiple Choice	(10-15 questions equaling 60 points)	
Component		60
Total Score		3300

10. TIEBREAKER

- a. In the event of a tie at the individual level, students will be separated by:
 - I. Highest Plant & Seed identification score, then
 - II. Highest Entomology score, then
 - III. Highest Plant Disease/Disorder score
- b. In the event of a tie at the team level, teams will be separated by:
 - I. Highest Plant & Seed identification team score, then
 - II. Highest Entomology team score, then
 - III. Highest Plant Disease/Disorder team score

11. RESOURCE MATERIALS

- The following resources are provided for preparing for the Soil Science component
 - UNL PASSeL- Soil science homepage: https://go.unl.edu/plantandsoilscienceelibrary

		TOMOLOGY SPECIMEN LIST		
ID#	Common Name	Latin Names, Order: Family for Possible Specimens	Life Cycle	Econ. Impact
11.	Alfalfa weevil, adult or larva	Hyperica postica, Coleoptera:Curculionidae	Complete - A	V
12.	Aphid	various species, Homoptera:Aphididae	Incomplete - B	R
		Pseudaletia unipuncta, Lepidoptera:Noctuidae (true armyworm)		
13.	Armyworm adult	Spodoptera frugiperda, Lepidoptera:Noctuidae (fall armyworm)	Complete - A	IS
		Spodoptera exigua, Lepidoptera:Noctuidae (beet armyworm)		
		Pseudaletia unipuncta, Lepidoptera:Noctuidae (true armyworm)		
14.	Armyworm larva	Spodoptera frugiperda, Lepidoptera:Noctuidae (fall armyworm)	Complete - A	V
		Spodoptera exigua, Lepidoptera:Noctuidae (beet armyworm)		
15.	Bean leaf beetle	Cerotoma trifurcata, Coleoptera:Chrysomelidae	Complete - A	F and V
		Epicauta pennsylvanica, Coleoptera:Meloidae (black blister beetle)		
16.	Blister beetle	Epicauta pestifera, Coleoptera:Meloidae (margined blister beetle)	Complete - A	V
		Epicauta vittata, Coleoptera:Meloidae (striped blister beetle)		
17.	Boll weevil	Anthonomis grandis grandis, Coleoptera:Curculionidae	Complete - A	F
18.	Chinch bug	Blissus leucoptera, Hemiptera:Lygaeidae	Incomplete - B	R
19.	Colorado potato beetle, adult or larva	Leptinotarsa decemlineata, Coleoptera:Chrysomelidae	Complete - A	V
20.	Corn Earworm adult	Helicoverpa zea, Lepidoptera:Noctuidae	Complete - A	IS
21.	Corn Earworm larva	Helicoverpa zea, Lepidoptera:Noctuidae	Complete - A	F and V
		Diabrotica barberi, Coleoptera:Chrysomelidae (northern)		
22.	Corn rootworm adult	Diabrotica undecimpunctata howardii, Coleoptera:Chrysomelidae	Complete - A	F and V
22.	Com rootworm addit	(southern)	Complete - A	r and v
		Diabrotica vergifera, Coleoptera:Chrysomelidae (western)		
23.	Corn rootworm larva	Diabrotica sp., Coleoptera:Chrysomelidae	Complete - A	V
		Agrotis epsilon, Lepidoptera:Noctuidae (black cutworm)		
24.	Cutworm adult	Peridroma saucia, Lepidoptera:Noctuidae (variegated cutworm)	Complete - A	IS

21	Chemigation unit for irrigation	61	Plastic layer
22	Combine (may be displayed with harvesting head attached)	62	Potato harvester
23	Conveyor/Elevator/Auger	63	PPE (all equipment)
24	Corn head for combine	64	Pressure gauge
25	Cotton picker	65	PTO shaft
26	Cotton stripper	66	Rotary hoe
27	Rolling harrow	67	Round baler
28	Disk	68	Row crop cultivator
29	Disk chisel	69	Row crop tractor (wheeled only tractor)
30	Draper head for combine or swather	70	Row independent forage harvester head (kemper head)
31	Drawn planter	71	Skid steer
32	Dry fertilizer density scale	72	Soil penetrometer
33	Field cultivator	73	Soil probe (for collection of soil sample)
34	Field shovel	74	Soil sample bag
35	Forage harvester (with harvesting head attached)	75	Soil thermometer
36	GPS receiver	76	Specialty tractor (orchard, narrow, low profile, high clearance)
37	Grain bin/leg	77	Sprayer
38	Grain drill (includes no-till)	78	Sprayer nozzle
39	Grain dryer	79	Square baler (large or small)
40	Gravity wagon	80	Strip tiller
41	Hand hoe	81	Sugar beet harvester
42	Hay merger	82	Swather (drawn or self-propelled)
43	Hay mower/conditioner (disk, reel/drawn, 3 pt., or self- propelled)	83	Sweep net
44	Hay rake (reel or wheel)	84	Tensiometer
	Hearing protection	85	Tissue sample bag
	Hitch pin	86	Tracked tractor (any configuration of tracks on a tractor)
	Hydraulic cylinder/hose	87	Vegetable transplanter
	In-line ripper	88	Virtual terminal/monitor/controller
	Integral planter	89	V-ripper
	Irrigation - lateral		Wheel loader
